Introduction

Democide is a term revived and redefined by the political scientist R. J. Rummel as "the murder of any person or people by a government, including genocide, politicide, and mass murder." Rummel created the term as an extended concept to include forms of government murder that are not covered by the term genocide.

Were Stalin's democide, during the war, of 13,053,000 people to be included, the number of people murdered by just the Nazis and the Soviets would exceed the total European war-dead.
