Thoughts to Ponder

"Experience hath shewn, that even under the best forms (of government) those entrusted with power have, in time, and by slow operations, perverted it into tyranny.

"I sincerely believe, with you, that banking establishments are more dangerous than standing armies." (Thomas Jefferson; Former President of the United States)

--()--

As with war, eugenics is the continuation of politics by other means (Miles Cummings)

--()--

Never attribute to conspiracy that which can be explained by greed and incompetence; but never assume that the greedy and incompetent, through stupidity or wilful ignorance, are not unknowingly part of a deeper conspiracy. (Unknown)

The Quotes

(Theodore Roosevelt (1858-1919); 26th President of the United States 1901-1909)

Society has no business to permit degenerates to reproduce their kind.... Any group of farmers who permitted their best stock not to breed, and let all the increase come from the worst stock, would be treated as fit inmates for an asylum.... Some day we will realize that the prime duty, the inescapable duty of the good citizens of the right type is to leave his or her blood behind him in the world; and that we have no business to permit the perpetuation of citizens of the wrong type. The great problem of civilization is to secure a relative increase of the valuable as compared with the less valuable or noxious elements in the population... The problem cannot be met unless we give full consideration to the immense influence of heredity... (Theodore Roosevelt to Charles B. Davenport, 03 Jan 1913)

I wish very much that the wrong people could be prevented entirely from breeding; and when the evil nature of these people is sufficiently flagrant, this should be done. Criminals should be sterilized and feeble-minded persons forbidden to leave offspring behind them... The emphasis should be laid on

getting desirable people to breed... (Roosevelt, "Twisted Eugenics," p.32, volume 106, January 1914 edition The Outlook)

--()--

(Harry Truman (1884-1972); President of the United States, and Founder of the CIA in 1947)

If we see that Germany is winning, we ought to help Russia, and if Russia is winning we ought to help Germany, and that way we let them kill as many as possible. (New York Times, 24 June 1941)

--()--

(Testimony given before a sub-committee House Committee on Appropriations, Department of Defense Appropriations for 1970)

Within the next 5 to 10 years it would be possible to produce a synthetic biological agent, an agent that does not naturally exist and for which no natural immunity could have been acquired... It would probably be possible to make a new infective micro-organism which could differ in certain important respects from any known disease-causing organisms. Most important of these is that it might be refractory to the immunological and therapeutic processes upon which we depend to maintain our relative freedom from infectious disease.

[Within a few years of this "Testimony", the AIDS epidemic began. There are proponents, such as Ian Cantwell, Jr., M.D. and Robert Strecker, M.D., who state that this germ [AIDS] was deliberately created, probably at Fort Detrick.]

--()--

(William S Cohen (1940-); US Secretary of Defence)

There are some reports, for example, that some countries have been trying to construct something like an Ebola Virus, and that would be a very dangerous phenomenon, to say the least.

Alvin Toffler has written about this in terms of some scientists in their laboratories trying to devise certain types of pathogens that would be ethnic specific so that they could just eliminate certain ethnic groups and races; and others are designing some sort of engineering, some sort of insects that can destroy specific crops.

Others are engaging even in an eco-type of terrorism whereby they can alter the climate, set off earthquakes, volcanoes remotely through the use of electromagnetic waves.

So there are plenty of ingenious minds out there that are at work finding ways in which they can wreak terror upon other nations.

It's real, and that's the reason why we have to intensify our efforts, and that's why this is so important. (In discussion with Senators Nunn and Lugar, 28 April 1997)

--()--

(David Rockefeller (1915-); Banker, Honorary director of Council on Foreign Relations, honorary chairman of Bilderberg Group and founder of Trilateral Commission. Member of Bohemian Club, Stowaway Grove at Bohemian Grove)

Whatever the price [The price being one hundred million dead] of the Chinese Revolution, it has obviously succeeded not only in producing more efficient and dedicated administration, but also in fostering high morale and community of purpose. The social experiment in China under Chairman Mao's leadership is one of the most important and successful in human history. (New York Times, 10 August 1973)

--()--

(**Barbara Marx Hubbard** (1929-); supported by Rockefeller Fund)

Out of the full spectrum of human personality... one-fourth is destructive... They are defective seeds... In the past they were permitted to die a 'natural death.' the elders the destructive one-fourth must be eliminated from the social body . Fortunately, you... are not responsible for this act. We are. We are in charge of God's selection process for Death... We come to bring death... The riders of the pale horse are about to pass among you. Grim reapers, they will separate the wheat from the chaff. This is the most painful period in the history of humanity. (The Book of Co-Creation: The Revelation Alternative to Armageddon, Part III Manuscript - "The Revelation: A Message of Hope for the New Millennium"; Date Unknown)

--()--

(**Dr Cornelius Rhoads** (1898-1959); of the Rockefeller Institute)

The Puerto Ricans are the dirtiest, laziest, most dangerous and theivish race of men ever inhabiting this sphere... I have done my best to further the process of extermination by killing off eight and transplanting cancer into several more... All physicians take delight in the abuse and torture of the unfortunate subjects. (Date Unknown)

--()--

(**Julian Huxley** (1887-1975); First director of UNESCO)

Political unification in some sort of world government will be required... Even though... any radical eugenic policy will be for many years politically and psychologically impossible, it will be important for UNESCO to see that the eugenic problem is examined with the greatest care, and that the public mind is informed of the issues at stake so that much that now is unthinkable may at least become thinkable. (Date Unknown)

--()--

(**Bertrand Russell** (1872-1970))

I do not pretend that birth control is the only way in which population can be kept from increasing... War... has hitherto been disappointing in this respect, but perhaps bacteriological war may prove more effective. If a Black Death could be spread throughout the world once in every generation survivors could procreate freely without making the world too full... The state of affairs might be somewhat unpleasant, but what of that? Really high-minded people are indifferent to happiness, especially other people's... There are three ways of securing a society that shall be stable as regards population. The first is that of birth control, the second that of infanticide or really destructive wars, and the third that of general misery except for a powerful minority...

War has been throughout history, the chief source of social cohesion by providing an external necessity for a society to accept political rule. ("The Impact of Science on Society")

--()--

(**Jacques-Yves Cousteau** (1910-1997); Explorer)

It's terrible to have to say this. World population must be stabilized and to do this we must eliminate 350,000 people per day. (UNESCO Courier, Nov 1991)

--()--

(**Richard Dawkins** (1941-); Charles Simonyi Professor of the Public Understanding of Science at Oxford University)

IN THE 1920s and 1930s, scientists from both the political left and right would not have found the idea of designer babies particularly dangerous - though of course they would not have used that

phrase. Today, I suspect that the idea is too dangerous for comfortable discussion, and my conjecture is that Adolf Hitler is responsible for the change.

Nobody wants to be caught agreeing with that monster, even in a single particular. The spectre of Hitler has led some scientists to stray from "ought" to "is" and deny that breeding for human qualities is even possible. But if you can breed cattle for milk yield, horses for running speed, and dogs for herding skill, why on Earth should it be impossible to breed humans for mathematical, musical or athletic ability? Objections such as "these are not one-dimensional abilities" apply equally to cows, horses and dogs and never stopped anybody in practice.

I wonder whether, some 60 years after Hitler's death, we might at least venture to ask what the moral difference is between breeding for musical ability and forcing a child to take music lessons. Or why it is acceptable to train fast runners and high jumpers but not to breed them. I can think of some answers, and they are good ones, which would probably end up persuading me. But hasn't the time come when we should stop being frightened even to put the question? (Sunday Herald, 12 December 2006)

--()--

("Project for The New American Century" - "Rebuilding America's Defences")

...advanced forms of biological warfare that can target specific genotypes may transform biological warfare from the realm of terror to a politically useful tool. (Rebuilding America's Defences)

End
