One of the most popular reasons for people "practicing" the law of attraction is to attract financial wealth. Consequently, here are some tips on how to do it:

1. Visualize What Happens When You Receive Bills

When you are in a relaxed state in a quiet room (just before going to sleep is a good time), close your eyes and visualize that you already have lots of money. Know for a fact that money is not a concern for you.

Picture yourself seeing bills arriving in the post with you smiling and opening the envelope. See yourself looking at the figures, smiling, and saying, "That's nothing - I've got more than enough money to pay this account."

2. Know What You Want To Buy With Your Money

You do not want money just for the sake of it - you want money so that you can buy specific things.

Therefore, imagine that you already own whatever it is that you want to buy. If you want money to pay for your children's education, then visualize your kids studying stress-free. Visualize yourself paying for the college fees effortlessly.

If you want money for a better house, imagine already living in your ideal house with the whole family. Imagine with as much detail as you can, such as where the kitchen is, what appliances and entertainment equipment you have, how big the rooms are, what your bedroom looks like, etc. You need to believe that you already own the house, and the law of attraction will give you the money to get the house by whatever means it knows.

3. Imagine Having Lots of Money in the Bank

Some people only want money in the bank, and not material things. This is so that they feel more secure in case of an emergency when they need lots of cash.

Before you fall asleep at night, imagine seeing yourself going to the bank and depositing huge amounts of money. Listen to the teller as they call you by name and mention how good it is to see you coming in to deposit money again.

See yourself handing her the money and also the amounts written on cheques. See the bank manager coming over especially to say hello to you since you are a very important and valued client.

4. Act Like A Wealthy Person

Go to the expensive shops. Walk inside and look as though you are there to buy. Try on the clothes. Ask the sales people questions. Ask them how much it costs and then nod your head and say "Not bad. That's reasonable".

Visit expensive restaurants and order a cup of coffee or soup. Something which is affordable. Or even a glass of water and pretend you're waiting for someone. Spend time at the restaurant and read the newspaper while you're there. You are experiencing places where the rich people go without spending lots of money. You're attracting more of the environment.

5. Carry More Than Enough Money Around With You

When you take out your purse or wallet, look at the cash and the credit cards and say that you have enough money to buy a lot of things.

When you see something you like, say to yourself that you can afford it and can buy it on the spot, but you don't want to. Say to yourself you want to shop around for something better.

Write cheques out to yourself, with a huge amount. Look at the cheques every so often so that you're applying the law of attraction that you're going to receive a huge cheque.

Using the law of attraction to attract money takes effort. The major problem is that a lot of people don't believe they can attract the money since they need it so badly. Relax yourself and follow the tips above and start to see money appearing in your life.

End
