Introduction

There is no single cause for hair loss; however, possible causes include:

- Anaemia
- Antibiotics
- Any lengthy and debilitating illness
- Barbiturates
- Chemotherapy
- Steroid drugs
- Stress
- The taking of too much vitamin A
- Thyroxine deficiency (thyroid hormone)
- Use of contraceptive pills

Stress

Stress is often a major factor with hair loss. Consequently, any stress elements should to be identified and countered by lifestyle changes or by learning and practising relaxation techniques.

Hypnosis and subliminal programs may also be of value in reducing stress levels.

Moderate aerobic exercise can also help with stress relief.

Therapy

To counteract hair loss, a whole-food diet coupled with a relatively high protein content can be therapeutic.

High protein sources include:

- beans and pulses
- eggs
- fish
- lean meat
- liver
- low-fat cheese
- poultry
- skimmed milk
- tofu
- wheat-germ

Jojoba Extract

Natural hair products containing jojoba extract can also have therapeutic value.

Almond Oil (pure)

Warm the pure almond oil, and gently massage into the scalp and very gently into the hair. Leave in place for an hour before shampooing with a natural, unscented, shampoo of the correct formulation for the person's type of hair.

Supplements

- Vit C - 1 gram (timed release), 2 x daily, together with bioflavonoids
